**22K GOLD CHAIR:** Italian Grotto chairs, where the seat and back are patterned after an open, flattened scallop shell, the arms are in the form of dolphins, and the splayed legs are composed of faux rockwork and scrolls, date back to the 17th Century. In Roman mythology, the story goes that Venus, daughter of Jupiter and the Nereid Dione, sprang from the froth of the sea and was carried by Cypriss on a scallop shell where her nakedness was clothed by the Seasons. Soon after, she was carried to the heavens where all the Gods admired her beauty. The scene has been depicted in many works of art and also became the inspiration for the Italian Grotto Chair.

These chairs are custom and are available to order through interior designers from Pacific Showrooms West at ADAC.
